

```
void ListTraverse(SeqList *pSeqList){
    printf("pSeqList->length: %d\n",pSeqList->length);

    for (int i = 0; i < pSeqList->length; i++){
        printf("pSeqList->data[%d]: %d\n",i,pSeqList->data[i]);
    }
}
```

1. pSeqList

1	[0]
2	[1]
3	[2]

2. Output:

```
pSeqList->length: 2
pSeqList->data[0]: 1
pSeqList->data[1]: 2
pSeqList->data[2]: 3
```
